

PIECES

**A new Swedish platform
dedicated to all possible objects
related to everyday spaces.**

Pieces are creators and curators of the unique and personal. We produce objects made with the craft, skill and quality of local Swedish production. Pieces was established in 2011 and grew out of a number of ideas that we wanted to develop in a more free and independent context.

Our name reflects our focus on creating individual pieces and objects. Sometimes a single item, sometimes a family. One, or many, connected or independent. Every piece will be a new narrative.

trotters®

The first furniture collection from Pieces is "Trotters"—a small family of low tables and open cabinets designed by Gabriella Gustafson & Mattias Ståhlbom from TAF.

Trotters are like characters from a cartoon, or small friends. Working with proportion and twisting the balance of the expected in a cabinet or table, the attention has been focused on the often forgotten and understated foot.

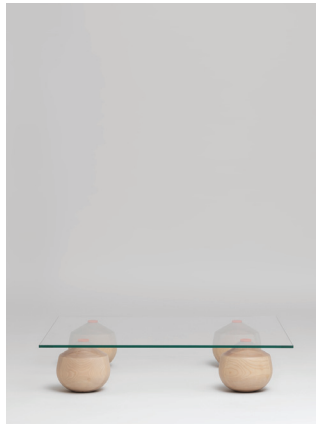

Playing with simple geometry the result is both witty and surprising. By altering only the materials of the foot, the collection provides many possibilities in a very simple way. The feet are available in wood, marble, or white glazed porcelain, carrying tables and cabinets of wood and glass. Additional details in pearl white and orange silicone. High quality materials combined with Swedish craft and tradition.

Accompanying the furniture collection is a first edition print from Kyuhyung Cho. A contemporary look based on the spirit of Trotters. Screen printed by hand and framed with the same solid birch wood found in the furniture collection.
