

PIECES

1 / 1

Designed by Gabriella Gustafson and Mattias Ståhlbom from TAF, the Trotters Extended Collection's bold and graphic form is presented in exclusive materials with a luxurious finish. The collection consists of a series of cabinets, sideboards and low tables finished in birch that accompany the award winning glass sofa table.

Building on the original Trotters collection, the addition of new cabinets and the selected finishes highlights the geometric expression of the work. Playing with proportion and twisting the balance of the expected in a cabinet or table, the attention has been focused on the often forgotten and understated foot.

The Trotters Collection is available in a choice of dark grey, light grey, white and natural matte finishes along with the option of either Kolmården green marble or solid birch feet.

Presented with the furniture collection is 'A Piece of Mind', a limited edition print from the amazing Kyuhyung Cho. Inspired by Dal Hangari, a traditional Korean white porcelain, Kyuhyung Cho has developed an exclusive contemporary graphic print for Pieces.

The work balances the graphic with the warmth and character of the imperfect, playing with the expectations of the viewer. Each limited edition print is signed and numbered by the artist.

The collection is presented in collaboration with Evert Lindelöf between February 5-8th at Hornsgatan 29, Stockholm.

About PIECES:

Pieces are a Swedish platform working with designers, artists and craftspeople to develop the unique and unexpected.

We produce objects made with imagination, skill and quality. Beginning from a common starting point we curate these objects to create series and collections.
